

Management Information Systems Course – CIS351

Fall Semester 2021/2022

Assignment Tow:

Q : Assume you are a system architect who was hired to criticize and provide suitable solutions and comments on Information Systems built and used in respectful companies and institutes. Use your managerial sense and technical experience to advice the best changes to be adopted.

- **Scenario One:**

The Jordan University of Science and Technology (JUST), has a significant technical team who is responsible for building the procedural flow for students' courses' registration. Nevertheless, there is still exist some valuable comments and feedbacks taken from the students in regards of the processes. Since you are a system architect who was once a student; provide (JUST) with your suggested modifications.

- **Scenario Two:**

Talabat ® is a well-known food ordering and delivery applications used by many users across Jordan. Think of all the current drawbacks and suggest modifications to be taken into consideration in your next meeting with the top management of Talabat ®

➤ **Notes:**

- ✓ Be creative.
- ✓ Trust Your Managerial point of view.
- ✓ Don't copy your friend's managerial point of view ;)

Good Luck
Zain ☺
